WL500

Unlimited premium sparkling water

The WL500 delivers exceptional sparkling water and all your chilled and hot water needs too. This fully programmable model features advanced Thermistor controls for more precise temperature control, ultraviolet light sanitization and large capacity CO2. The WL500 will invigorate your workplace with great taste and refreshment throughout the day.

Advanced Technology

The WL500 sparkling has three core technologies:

1. High Performance Filtration: Multi-stage filtration removes common water contaminants and chlorine to dramatically improve water taste and odor.

2. In-Tank UV: An in-tank ultraviolet light prevents biofilm buildup and reduces bacterial growth to guarantee fresh clean water.

3. BioCote® Antimicrobial Protection: Plastic surfaces surrounding the dispensing area are infused with BioCote® which actively reduces levels of microbes on a surface by up to 99.9%.

Good for the Earth
Waterlogic coolers have been shown to reduce carbon footprint by up to 72% compared to bottled water coolers*. Bottleless water coolers reduce plastic bottle contribution to landfills.

Performance Worthy of an Encore

• Advanced carbonation technology to produce exceptional sparkling water

• Ultraviolet technology to reduce bio-film build up and bacterial growth

• Designed for high capacity use

• Advanced Thermistor controls for more precise temperature control

• Offers a wide range of water options including hot and extra hot

• Available in tower and tabletop models

• Digital display with multiple language settings

• UV indicator and drip tray alarm

• Sleep mode to save energy when the machine is not in use

• High capacity drip tray with drainage option

The Boring Bits

Water Options	Technical Features	
	Type available	Tabletop Tower
	Tabletop dimensions	17" (W) x 18.75" (H) x 17.75" (D) 432mm (W) x 476mm (H) x 450mm (D)
	Tower dimensions	17" (W) x 50" (H) x 17.75" (D) 432mm (W) x 1270mm (H) x 450mm (D)
	Dispense area height	6.75" (170mm)
	Weight	Tabletop: 35lbs (15.9kg) Tower: 104 lbs (47kg)
	Recommended filtration	Tower: Carbon Block (CBC), Granular Activated Carbon (GAC) Tabletop: Carbon Block (CBC)

Symbols		
Cold water	Additional features	BioCote antimicrobial surface protection Filter change alert Drip tray full sensor UV indicator Sleep mode Optional base cabinet with cup holder
Hot water	Capacity	Cold: 3 liters (0.660 gal) · Hot: 1.6 liters (0.352 gal) · Sparkling: 1 liter (0.220 gal)
Extra Hot water	Compressor	120v / 60Hz compressor
Sparkling water	Water temperatures	Cold: 41°F / 5°C Hot: 189°F / 87°C Extra Hot: 203°F / 95°C
